Bridge Version 4.79

HHD

- 912708: Fix for validating bin number on stocktake with new BridgeWMS and if it's incorrect bin then it will display user message "Invalid Bin".
- 912578: Product code validation is not done at point of scan, rather it is done at point of send (BridgeWMS)
- 912654: Product code on all works orders screens show in red to highlight.
- 912656: Cannot go pass 'OK' message but cannot go past this message. This is during the pack process on the scanners after picking.
- 912708: Stocktaking was not doing a live bin lookup when entering products, rather it is doing the bin check at point of sending the data
- 912571: In movements, per serial item, to enter the quantity that is being processed, and would then like to assign, or scan each serial number. Rather than 1 at a time as the system currently allows.
- 912759: Fix for PO receipts was not marking fully received lines.
- 912757: Fix for PO receipts if user clicks skip on batch screen and re-scan same product it was hiding bin field on batch screen. A change has been made to allow user to confirm bin number for non-stock item on scanner.
- 912218: Issue when trying to overpick combined orders - "Next combined line is not valid - skipping"

Build 11
- Fixed: fulfil serial in stock movement and PO matching
- Fixed: PO matching not ticking check-box when scanning product
- Fixed: live Picking locking when not finding any orders
- Corrected: match PO not asking for bin on batch screen after first time

Build 12
- Added: consolidated pick to BridgeWMS
- Removed: check for empty bin on confirm bin livepicking
Build 13
- Added: cancel button to printing on stock lookup
- Fixed: lookup expiry date to use the year
- 912786: Was not allowing user to cancel packing, if user cancel packing it was still completing.
- Fixed packing not fulfilling serials
- 912756: PO receipt with Due Date First option, when user scan product barcode on PO lines screen it does not scan, but if you un-mark Due Date First it works fine.
- 912673: Wont let the user back out of the Pack Order screen.

Build 14
- Fixed: matchPO not selecting line by barcode when use due date first
- Changed: live picking to not ask for picker when continuing to next order
- 912825: Live Non-marshal picking with full courier and by courier, not allowing user to under pick quantity.
- 913153: Live transfer with use a transfer check file was showing "Incorrect Product" even if user scans or tap on correct product line.
- 913171: With full courier if user changes courier name it was setting value "1" for how many packed field.
- 912857: Live picking with MBTrack if user try to over pick quantity it was not focusing exp. date field after confirming batch number.
- 913131: Live picking with opera trace item will display insufficient quantity message on batch screen, if batch has no enough quantity available.
- 912931: "Non-MJM Courier" orders was sending the details to DX and they are sending these with someone different other than DX.
- 913026: When completing WO was showing required. quantity as ".T.".
- 912363: Live picking with marshalling and combine orders was not allowing user to over pick qty.
- 912365: Shows pick bin throughout replenishment process on scanner.
- 912530: Fail after picking few lines but not showing any error on scanner.
- 911487: Fix for, if user skip any line it was not bring down skipped line after last order line.
- 913278: Fix for, scan and increment on stocktake was not showing correct scanned quantity for scanned item.
- Fix for: Not displaying error message on WO issue if component is locked.

LiveLink

Bug Fix:

- 912792: If GroupProductsOnPick = 0 in live link config and when you try to pick an order live link was failing with Error - VFP:Error: 1807 in Method: getorderlines at Line: 1341 Message: SQL: GROUP BY clause is missing or invalid.
