

HHD

Build 1

- Added new Bin replenishment option from stock menu.

Build 2

- STOCK TRANSFER (WITH 2-WAY)
- 1 - after scanning products on FROM tab, if I go to review screen and try to edit any line it shows error "There is no row at position 0" | if I click ok HHD crashes.
- 2 - if I try to delete item from review screen it's not deleting anything and not showing any error.
- 3 - on from tab if I scan bin which has no quantity | scan product | enter quantity to transfer | now showing any user message that bin has no quantity to transfer and when I go to TO tab and try to transfer now it shows insufficient stock of in bin from (bin number), so it should display this message on FROM tab.
- 4 - on FROM & TO tab it's only validating w/h & bin for example, if I enter 1234 or blank as w/h & bin | and scan correct product it shows invalid product but not showing any user message on incorrect w/h & bin.
- 5 - if I leave reference blank and try to transfer it shows user prompt "reference cannot be empty" when you scan w/h, bin and product on FROM tab, it's not showing this message when user press enter on reference screen.
- Live Sales order picking fix. When under picking the required quantity will now be correct for standard, Multibin and trace.
- Removed the unfinished bin replenish button.
- Fixed the configuration, more specifically the 'Prompt for Box Details' option.
- Added stock.lb back to installer.
- STOCK MOVEMENT With Live Link. if go to review it shows correct product, bin and previously entered quantity and if you leave quantity blank and save it allows user to send csv file,
- STOCK MOVEMENT With Live Link. It removes previously entered comments when editing from review screen.
- Configuration. if you tick "Use Marshalling w/h" | save | go back to config again use marshalling is unticked, so it's not saving
- SO with live link when you park order and start picking again it shows "Show parked order?" messagebox twice, but works fine.
- Standard picking now does length check (anything 10 or over that doesn't contain '.' or '/' throws message).

Build 3

- 2 part transfer (MultiTransfer)
- Disabled prompt for box details and consignment no, when full courier or no courier is selected
- Fixed courier not working with some valid configurations
- Changed live link config to show the option without needing to exit config.
- Fixed quantity incrementing when scanning product on quantity field in PO matching
- Fix for, S/O review on HHD not showing correct W/H

Build 4

- Fix for 2-step transfers (without Multi Transfer, Standard Bride & Bridge3 with & without Trace), after confirming quantity on TO tab it was not going back to FROM tab
- Fix for 2-step transfers (with & without Multi transfer), was not clearing product code & quantity after confirming quantity for previous item.
- Fix for, when you mark or unmark "User on Transfers & Movement" was showing user on both process, but now it's fixed.
- Fix for Creating S/O from HHD, after scanning few items when you go to review screen it was changing w/h name.
- Fix for not inserting "/" & "." when you transfer stock using "Transfer check file" method.
- Fix for S/O packing, when you input quantity "0.0" it was setting req. quantity to 0.0
- Fix for live transfer (simple transfer), after scanning user if you want to cancel process without scanning any product it was showing message "Delete remaining transfers"

LiveLink

Build 1

- In Live transfers the check for to see if it's the same warehouse has been removed (when doing bin replen.)
- Update to the PO receipting for the front screen.

Build 2

- Added in the grouping for live picking, this has a new Config setting in the config.txt (GroupProductsOnPick) that is set to either 1 or 0. This groups all lines that have the same product code when picking. When receipting it fills it in the order sequence. This should work with standard, multi-bin, MBTRACK and SOPkitting.
- Fix for, stock lookup "Property FIFODT is not found"

Build6

- Fix for Live S/O unable to find order on HHD, variable "CSX_DPBIN" is not found.

MultiBin and Tracking

- 99391: Added new options under Action menu "Print Batch Labels" and "Delete Tracking Record"
- 99594: Added amend price facility within the bridge GRN.
- Fix for Receive PO Delivery, Import csv | Action | Print | Opera was crashing with "DO_BTCHSER" is not found.

Bridge

- Fix for, printing issue from import P/O screen.
- Fix for, Stock Consignment allow user to mark line if counted QTY is more than In-Stock QTY.
- Fix for, if there is no file for stock consignment it shows message "No file to Import", but if you try to import second time it shows same message and if you click OK to message opera crashes.
- Fix for, decimal & faceted quantity issue in consignment

Bridge 3

- 99594: Added amend price facility within the bridge GRN.

Build 2

- Fix for, Stock transfer (batch mode) printing with "F2" "Source and Destination W/H are same" message while W/H are different.
- Fix for Requisition, when you | Import req file | send to PDA | print on screen | close print screen | Prints out correctly, but when you close print screen it shows opera error "Cannot create child resource from parent"

Despatch Manager

- 99614: Allow overdue highlight to look at order date rather than due date.
- 99681: Allow edit fields in despatch manager to change due date of the lines of the order.
- 99613: Now keep allocations of the orders if user changes priority on Despatch Manager, there is a checkbox in Options "Clear Pick on Priority (InPick)"
- 99542: Added Export menu to export orders from any tab in despatch manager.

Tracking

- Fix for, Printing Action | F2 | was not printing

- Fix for, Printing Action | F10 | was not printing
- Fix for, Print batch balance was not printing.
- Fix for, Once MJM Trace Enquiry form loads | press right or left arrow key | opera crashes with "Unknown Member Pager2 error"

MJM Print

Build 1

- Added the ability to type in batch and serial if no batches/Serials are found.
- Added the ability to filter by delivery number on 'Print By Range'. Delivery number is added to the end.

Build 2

- Fixed the delivery number not working on the 2nd/3rd drop down in 'Print by Range'.

Build 3

- Changed the 'Print By Range' to include a customer's bespoke.
