

Despatch Manager

You have just received an order, what is your next step?... Despatch Manager provides an ERP external platform to centralise and track every order from receiving confirmation to delivery. Observe the progression of your orders in real time, check on outstanding orders or view all the completed orders. Despatch Manager will increase efficiency in picking and decrease longevity of outstanding orders. Order Despatch Manager to Bridge order with real time capabilities for better Warehouse Management.

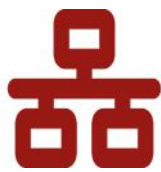

Allocate Order

Keeping track of one specific order is possible and simple with Despatch Manager. Allocate an order to a picker and oversee the whole process of the order. After the orders are allocated on the PC, they can be downloaded onto hand held devices ready for each picker to open their allocated orders and start picking them.

Interface to Courier

Once items have been picked, Despatch Manager can interface directly with courier software. This allows for a smooth transition of the product from the warehouse, in transition and onto the customer.

Link to Opera

Despatch Manager links in real time to Opera which allows the users to directly print delivery notes. Also, as orders are picked, the Despatch link to Opera automatically updates stock levels which can be immediately viewed from Despatch Manager.

Benefits

- Accurate and detailed order records are maintained.
- Sales Order management is live.
- Sales order statuses are updated automatically.
- MultiBin is applicable to this module.
