Mobile Computing & EPoS Distribution

Mobile Computing

Datalogic's wide range of mobile computers guarantee partners the highest level of compatibility and openness to industry standards.

Handheld Computers

Datalogic's Handheld Computers are compact and lightweight devices available in a variety of form factors from pocketable keyboard based to 5" full touch rugged mobile computers, offered in both WiFi only models and full cellular capability.

The DL-Axist™ PDA is a rugged full touch Enterprise Class PDA with Android™ technology and a brilliant 5" screen. The DL-Axist's industrial robust design means this PDA survives most indoor or outdoor environments.

Superceding the Skorpio™ X3, the Skorpio X4 mobile computer features high performance architecture that offers blazing speed for legacy applications while providing an easy migration path to Android.

DL-Axist

Industrial Computers

Datalogic's Industrial Computers are extremely rugged and designed for forklifts and industrial vehicle applications.

Rhino II

The Rhino II has a sealed design tested to IP65/IP67, ensuring operation in the toughest environments. Its dedicated freezer-rated model with integrated display heater allows use in and out of cold storage. Plus the capacitive touch models feature 3mm anti-glare armored glass, while still allowing use of gloves.

Tailored for warehouse management, the Rhino vehicle mount computer increases productivity with its easy integration of PowerScan or other automated data collection devices.

Rhino II

SH15 / SH21 Blackline

The SH15 Blackline computer is a rugged vehicle mount computer (VMC) as well as a fixed mount unit for use in any industrial application.

The SH21 Blackline computer is an industrial computer designed for wall or fixed mount industrial applications.

A sealed design tested to IP65/IP67 ensures operation for both computers in the toughest environments. The capacitive touch models feature 3mm anti-glare armored glass which can be used even when wearing gloves.

SH21 Blackline

SH15 Blackline

Wavelink® Avalanche™

Wavelink® Avalanche™ provides a clear and complete view of the state of your mobile device assets. At a glance you can see all the devices under management and the last time they were updated.

Green Spot Technology

Datalogic's Green Spot Technology acts as a good-read indicator by projecting a green spot directly onto the barcode just scanned, ideal for loud environments or when silent reading is required.

Green Spot Technology allows you to receive visual confirmation of a good scan.

Aladdin Configuration

Datalogic Aladdin provides you with the opportunity to manage the configuration of handheld products. The software tool also makes it easy for you to upgrade the handheld's firmware, to attain the benefits of new reader features.

Barcode Scanners

Datalogic offers a variety of form factors and features to solve data collection needs. These can be offered as either on-counter, in-counter or fixed barcode readers.

General Purpose Scanners

The wide range of general purpose handheld readers offer a variety of choices for most data collection activities. Product sets offer conventional laser, linear or area imaging technology, plus a variety of features to meet specific scanning needs.

Datalogic's QuickScan series of economical readers are designed for use in retail and office environments and offer snappy reading performance. The QuickScan 2131 wireless series of 1D Linear Imagers are the ideal solution for POS checkouts, hospitality and commercial services. Featuring a long reading range, wide scanning angle and snappy barcode reading.

The Gryphon series are a range of high performance general purpose scanners for use in healthcare, hospitality, light manufacturing, retail and warehousing. The Gryphon GD4300 has no issue with scanning poor quality barcodes and low contrast labels with bad edge definition plus Datalogic's patented Green Spot provides visual good-read feedback directly on the code, allowing for fast and accurate scanning.

**QuickScan
2131 Series**

Presentation Scanners

Datalogic's wide range of presentation readers offer a variety of form factors and features to fulfil any data collection needs. They represent the ideal solution for POS applications in convenience and specialty stores as well as pharmacies.

The 3400VSi scanners provide outstanding performance on hard-to-read barcodes and seamless reading of a wide variety of barcodes.

**Magellan
3450VSi**

Rugged Scanners

Datalogic's PowerScan industrial handheld readers are data collection's definitive example of ruggedness and durability. Often imitated, but never rivalled, the PowerScan products rise above the fray with their outstanding performance and unyielding reliability.

The PowerScan 9100 linear imagers introduce new scan engine technology, an innovative green laser-like system based on a pioneering miniaturized linear imager scan engine. This technology provides the same definition of a laser scanner but with the additional benefits of an imager in terms of decoding capability on LCD screens, high performance on low contrast codes, and outstanding scanning capability on high density codes, combined with the safety advantages of imaging technology vs. laser technology.

**PowerScan
9100**

Patented 'Green Spot' - Good Read Confirmation

Datalogic's 'Green Spot' Technology acts as a good-read indicator by projecting a green spot directly onto the barcode just scanned, ideal for loud environments or when silent reading is required.

The 'Green Spot' Technology allows your customers to receive visual confirmation of a good scan.

Datalogic EASEOFCARE

Datalogic offers a wide and complete range of post-sales services to protect your investment, making your data capture systems more efficient, reducing maintenance and assistance costs, while ensuring maximum productivity and profitability.

Datalogic EASEOFCARE Service Programmes provide customers with the best life-cycle maintenance at a cost effective price. Programmes include 3 and 5 year coverage options at the time of product sale. All the EASEOFCARE programmes for Mobile Computers also include Wavelink® TE and Avalanche™ software maintenance for the selected service programme duration.

Datalogic Partner Programme

The Quality Partner channel programme supports a mutual commitment to success. It is designed to provide higher margin opportunities, cooperative selling and the opportunity for growth and rewards. The advantages and benefit package is aimed to expand business opportunities, increase success rate in negotiations, smooth operations and make the overall relationship with Datalogic easier and more efficient.

To join the Datalogic Partner Programme visit www.datalogic.com and complete the application form.

Why Partner with Varlink?

We have a single goal. To be the best Value Added Distributor of Mobile Computing and EPoS Hardware in the UK.

Our expertise comes from listening to you and understanding the needs of your customers, which means we offer Solution Providers the perfect tools for the job. Drawing upon our extensive range of manufacturers and products, there isn't a problem we can't help solve.

Varlink has for a long time been supplying cutting edge Mobile Computing and EPoS technology, and we have achieved this by not only offering the right product, but by having the right people for the job. With our extremely experienced team we are able to support our customers throughout their product selection process and beyond.

With you all the way

Our UK based distribution and support network means we can supply and manage your needs faster. We're local, delivering to the UK from the UK, which cuts service time and the cost to your business. While our support team, also based here, are on hand whenever you need them.

For Varlink, our service doesn't stop at the door. Our UK based support team are there to provide pre and post sales technical support. This expert after care is there to help you get the most out of all your devices.

Exceptional delivery as standard

We understand the importance of goods arriving on time, and you can be assured of a delivery service that meets the needs of your business. Not only do we offer comprehensive delivery options, we also fulfil plain label shipments or even requests for the inclusion of your own branded delivery notes. You can call off your orders in line with your project demands for delivery at dates to meet your timescales.

An extension to your resource

We strongly believe that marketing impacts on your sales achievements. That is why we have put together a range of marketing services to help you promote the hardware which we distribute as part of your complete service offering to end users.
