

Eurosurgical

Company

Eurosurgical was founded and specialises in the sales and marketing of surgical equipment, instruments and devices to the medical profession. Eurosurgical is committed to the supply of medical devices in order to achieve maximum customer satisfaction. They pride themselves in involving their workforce, customers and suppliers in a continual process of feedback and improvement. The responsiveness and effectiveness of dealing with customer requirements and expectations is always monitored and improved where necessary.

Need

- A more effective goods in process dealing with barcodes
- A speedier rate of booking in goods
- Solution of scanning individual barcodes and storing serial numbers
- A complete traceable system to meet the requirements of the plastic surgery industry

Solution

Bridge was installed with Nautiz X4 handheld units:

- Uploads information direct to their system from the goods in process
- Can be linked up to their Zebra GK420d printer for serialised label printing
- Traceability module allows serial numbers to be collected and viewed in a table
- Purchase orders can be sent to the hand-held and deliveries can be matched to the purchase order.

For more information about how the Bridge Software can be used in your company please follow the links below for all our products.
