

Press information

April 2016

MJM Data Capture will be appearing at an exhibition dedicated to the latest innovations in business solutions at Wetherby Racecourse on 19 April.

Hosted by Boston Spa-based IT providers, [Deans Computer Services](#) (DCS), the Spring Showcase event features 20 different exhibitors offering expertise and insight across a wide variety of specialisms, including Cloud-based systems, internet/data security and encryption, warehouse management and barcoding, creative apps and Sharepoint, document management, manufacturing software, accountancy, ecommerce, custom software, communications, digital marketing, new hardware and many others. Businesses of all types and sizes are invited to attend and the doors will be open from 10am to 4.30pm in the Marston Moor Suite in the Millennium Stand.

DCS Managing Director, Patrick Clayton, said: “The Spring Showcase is an opportunity to share and discuss new ideas, but more importantly it’s a great opportunity for companies which aren’t particularly tech-savvy or knowledgeable about IT. Staying up-to-date with the latest solutions and software can be a daunting task for many businesses and this event provides a relaxed setting to learn more about contemporary systems, technology and online facilities which can improve efficiency and assist growth.”

“Our dynamic line-up of exhibitors is drawn from locations across the UK and we are delighted that MJM Data Capture are joining us for the event – they are specialists in mobile computing, data capture and warehouse management. MJM focus on developing a range of mobile data capture solutions offering both standard and bespoke software.”

DCS Marketing Director, Suzie Cowling, said: “Numerous attendees at our previous Spring Showcase in 2014 said the exhibition was a valuable insight into the latest IT products. Many of them used the event to gather information for future projects and I’m sure that many visitors will take similar gains from this year’s event. Entry is free and you can register your interest online at www.deansplc.co.uk.”
