BRIDGE WMS

The Complete Warehouse Solution

Overview

Bridge WMS is a modular, configuration and customisable user-friendly solution which is designed to ensure accurate and efficient processes (utilising barcodes) throughout the supply chain ultimately for better Warehouse Management. Bridge WMS incorporates all aspects of day-to-day routine including, Goods Receipts, Picking Orders, Stock Movements, Transfer and Stock Takes, the solution provides real time updates for the most 'live' warehouse you could need.

Stock Manager

Allows you to track the purchase, storage, and sales of your products at every stage to ensure product availability and optimise the warehouse. It helps businesses keep track of their stock levels, so they can make informed decisions about how much to purchase/produce and when.

Key Features:

- *Traceability/Serial/Batch.
- Multilocation (Bin/Bay/Aisle/WH).
- Stock Replens. (bin levels)
- Stock Requisitions.
- Stock Lookup.
- Stock Taking.
- Stock Movements.
- FIFO Movement.

Receipt Manager

Allows you to centralise and track every order from creation to receiving goods. It is all about quickly and effectively receiving the delivered goods into your inventory. You will observe the progression of your orders, check on outstanding orders or view all received orders.

Key Features:

- Manage Multiple Orders.
- EDI Link.
- Control Quality/condition.
- Product Labelling.
- Multiple Approval Levels.
- Put Away.
- Create Purchase Orders.

Despatch Manager

Provides a platform to centralise and track every order from receiving confirmation to delivery. Observe the progression of your orders in real time, check on outstanding orders or view all the completed orders. It will increase efficiency in picking and decrease longevity of outstanding orders.

Key Features:

- Multiple Picking/Packing options.
- *Courier Integration.
- Product Despatch Labelling.
- Assigning Pickers to Orders.
- Visibility of all Orders.
- *POD Integration.
- Delivery Notes/Packing List Production.

*Traceability

Helps provide the ability to track the history, location and movement of inventory items throughout the supply chain, from receipt to storage, picking, packing and shipping

Key Features

- Track by Batch/Lot/Serial Number.
- Monitor Movement.
- Audit Trail.
- Recall Management.
- Compliance.

BRIDGE WMS

The Complete Warehouse Solution

*MRP

Material Requirements Planning (MRP) is a process that helps ensure the right materials are available at the right time and in the right quantities to meet production or order demands. It essentially bridges the gap between inventory management and production planning, ensuring efficient and timely stock availability.

Key Features:

- Calculates material needs based on current inventory, open orders, and forecasted demand.
- Generates purchase or production orders to replenish stock before it runs out.
- Optimises inventory levels to avoid overstocking or stockouts.
- Improves planning accuracy.

*Courier

Streamlines and automates the process of shipping goods by integrating with courier and logistics providers. This module helps reduce manual entry, minimize errors, and speed up the dispatch process.

Key Features:

- Automatic Label Generation:
- Connects directly with major carriers (e.g., Royal Mail, DPD, DHL)
- Provides tracking numbers and status updates directly within the WMS.
- Generates end-of-day manifests for courier pickups.

*Proof of Delivery

POD confirms that a shipment has been successfully delivered to the intended recipient. The POD module captures and stores delivery confirmation details, such as recipient signature, date and time of delivery, photographic evidence and courier notes.

Key Features:

- Confirms order fulfilment
- Resolves delivery disputes
- Supports customer service and returns
- Provides legal and audit documentation
- Direct link to google maps

*Mobile Sales

Mobile Sales lets you create a new sales order wherever you are and when connected to Wi-Fi or GPRS it can be sent to your system ready for picking authorisation. Link a sales order to an existing account.

Key Features:

- Customer Selection
- GPRS & Wi-fi while off site
- Scan Product Barcode
- Stock Look-up
- Edit/amend orders

Benefits

No transcription/handwriting errors means improved accuracy. Reduced duplication of transactions results in enhanced utilisation of staff. Time saved during work hours can be allocated to focus on customers. The standard modules can be customised to suit you as your company grows.

Key Features

- 80% average time saved during stocktake.
- Improvement in picking reduced errors.
- Accurate stock holding.
- Reduced stock.
- Real time forecasting of stock-outs.
