BRIDGE WMS

The Complete Warehouse Solution

Receipt Manager

The Bridge WMS Receipt Manager centralises and tracks every purchase order from creation to receiving goods. Observe the progression of your purchase orders in real time, check outstanding orders or view all the received orders. Once goods have been received into the warehouse, they must then be moved to a warehouse bin by scanning the goods to the assigned bins using a handheld device. This cuts out human errors and improves efficiency, everything is then updated automatically to your stock levels.

Receiving Purchase Orders

Enables you to receive the delivered goods into stock effectively and efficiently. All types of receipts can be performed i.e. stock/non-stock. Orders/lines can be held, pending QA inspection, before being actioned to go to stock. Large consignments (Multiple Orders) in containers can be unloaded efficiently and POs automatically updated with receipts.

Key Features:

- Find orders by PO number/ supplier/ shipment number.
- Prompt for quality/ condition/ temperature/ date of manufacture.
- Direct put away to Default bins.
- Generating & printing new item labels.
- Batch/serial traceability recording.
- Record shelf life/expiry.

Put Away

Once your goods are booked into a predefined “goods in” bin. They must then be moved to a location by using handheld devices, scanning products into the correct location is made easier and more efficient. This will automatically update your stock levels without any human errors.

Key Features:

- Put away to default bins.
- Directed to empty bins.
- Put away list.
- View items not put away.
- Stock placement on multiple bins.

Create Purchase Orders

Create a new Purchase Order in seconds as pre-saved default data can be quickly selected, including supplier, address, and stock items. Orders can also be edited and reviewed before being committed to the ERP for a final check. Items can be scanned, or you can input the product code manually to add an item to a Purchase Order.

Key Features:

- Accurate and detailed order records.
- Live Purchase Order data.
- Automatically updated PO status.
