WMS Version 1.34 Development Release Notes

Desktop Changes:

- Added MacMurray's Haulage Courier (API)
- Added Maximum weight checking for Bin
- Receipting batch, updating expiry only if different
- Creating Sales Orders, delivery address resyncs out of alignment
- Added Order Email to customer sync and courier outputs
- PO & SO Info Labels created and added to installer output
- Added Job Costing Number to Sales Order Picked CSV Label
- Corrected decimal and VAT pricing issues for orders raised from WMS
- Serial Range Label updated to support order number output
- Corrected Sales Order Processing foreign currency decimal placing outside of FUNDEC
- Added support for customer info parsing from imported orders for select clients
- Added new config option to allow default warehouse for multi warehouse despatching (part 1)
- Fixed IQ systems forcing picking from the same warehouse in Despatch Manager
- Prompt Courier Printer bug fix
- Proof Of Delivery multiple loading for the same address config added
- IQ; Resolved unable to over receipt via multiple lines due to Opera PO balance logic
- IQ; Prevented Product Branch sync adding Sync Transaction records upon creation. Also, now truncate Sales Order despatch method and instructions to stop some orders failing on insert
- Added option to email the delivery note to the customer upon despatch
- IQ; Prevented Stock Transaction sync from including transactions pre-initial Stock Level sync
- IQ: Fixed Purchase Order Receipts in WMS from duplicating from IQ due to varying receipt dates, Transaction will now hold the delivery reference
- IQ: Sales Order Sync will now create priority if nonavailable and error accordingly if still nonavailable
- Opera: corrected sales order pricing for foreign currency orders raised in WMS
- IQ: Batch Stock Transactions could potentially be skipped if a different batch met the criteria of the transaction, now checking the batch tied to traceable transactions when pulling transactions from IQ
- Unable to over-pick a Sales Order in Despatch Manager resolved
- All Orders tab now features pick list report functionality
- Fix for Issue when changing date on sales order - Edit Order
