WMS Version 1.40 Development Release Notes

Desktop Changes:

- New option added 'Check Ledger Account Credit Stop' to enable Credit Stop checks to be against the customer and the ledger account for SOP
- When making a stocktake, the items will be sorted alphanumerically
- New option added to send requisition email, if configured
- Add option to skip prompt for Opera WO pricing on desktop like on scanner
- Sort bin list on transfer list based on pick bin while sending the transfer list
- Date format correction for Stock take variance report Excel format
- McMurray's DDAY courier service now correctly chooses Tuesday for the delivery day when a despatch/shipment date of Friday is entered
- Added 'Stock Take Sync to Align With WMS' setting which will adjust stock in Opera upon syncing a stock take to make both systems match in counted figures.
- Fixed Stock Take sync including already marked as synced transactions if edited and recompleted
- Added Multi batch selection option on WO Complete/Issue

Windows Mobile

- Added config to remove prompt to print labels in WO completion
- Added check to pick line to prevent duplicating of serial numbers with temporary values
- Added ability to transfer temporary serials numbers in stock transfers

Android

- Split quantity via copies now produces just the required single label file rather than 1 per label quantity duplicate
- Simple Adhoc Printing crash when prompt for printer is disabled resolved
- Adhoc Printing crashing on 360dp devices resolved
- Fixed android getting stuck on printer selection in PO receipt with no printers
- Fixed GS1 barcode not being accepted after first scan in PO receipt
- Bin is now at the front of stock lookup

POD

- Made receipt box on delivery larger
- Changed font size on "Can't deliver", "Directions", "Deliver" from 11 to 10 so that it no longer goes to two lines on the XG200 scanner
