BRIDGE WMS

WMS Version 1.57

WMS Version 1.57 Development Release Notes

Bridge WMS

- Default Pick Location now defaults to 'Oldest Sufficient Stock'.
- Fix for cloning the handheld config not correctly copying the functionality tab.
- Added combined 'Assign Picker and Packer' option to the 'Available to Pick' tab allowing users to assign a user as both picker and packer of a single order or list of orders.
- Fix for the quantity rounding problem for factored products.
- Added ability to change default despatch transaction comment.
- Fixed alignment of "Default from WH to destination WH" and "Show set default bin" config options, in handheld config, under stock.
- Changed default for 'Post To Nominal' to False in 'Opera API' config.
- Added yes/no prompt for adding padded 0s to auto-generated serials.
- Prevented trying to approve on an empty receipts tab causing a print for every historic PO Line.
- Pick check sheet now shows remaining balance as well as picked balance for all lines.
- Changed gross weight field in product table to use 3 decimal places like Opera.
- Added new setting "Disable Auto Despatch on SO Description Lines" to disable the automatic despatching of descriptive lines in Opera when despatching an SO via WMS.
- Added new setting "Disable Auto Receipt on PO Description Lines" to disable the automatic receipt and satisfying of descriptive lines in Opera when receiving a PO via WMS.
- Desktop picking now treats labour lines the same as non-stock lines. Previously unpickable, now can be processed if manual non-stock processing is enabled.
- Basic Sage 50 Accounts (non-cloud) integration added.

POD

- Prevented Loading underpitched packages when using 'Load all with address.'
- Fixed single packages being loaded into POD not checking for duplicates in grid.
- Added prompt for 'Load all from address' when loading by delivery number if both settings are enabled.

Android

- Fixed the 'Purchase Order Receipt Creation' label triggers not firing when receiving a shipment line.
- Added label selection dropdown box to Sales order dispatch label selection.
- Fixed scanning into warehouse field while limit to default warehouse is enabled on stock movements/transfers.
- Added Total boxes prompt to Create SO.
- Fixed create SO showing out of stock message when dispatching order with out-of-stock line when editing order.

- Prevented crash in Create SO when editing parked orders.
- Stopped 'Get Order Lines' bringing down unassigned lines with 'Assigned Orders Only' enabled.
- Fixed selecting Sales Orders by document number not working in pick/pack.
- Fixed quantity to build and quantity per kit colours.
- Fixed "not enough batch in stock" error message.
- Changed text to "kits to build" instead of "to build".
- In Create SO, added check for insignificant stock, prevented lower line quantity below packed quantity and fixed already picked lines not being dispatched.
- Changed not enough stock error for batches to "Not enough of batch 'X' is available in current bin" and made it the same on all areas.
- Serial transfer focus now goes to date of manufacture.
- Added config to group by batch when not searching by product also fixed crash when double clicking grid after scrolling.
- Added courier prompt to picking when picking is started through view line.
- Fixed error when picking just 1 pallet on SO pick.
- Stopped package type spinner from being accessed when it is already set per line.
- Added config to spilt order lines in packing into entered number of packages.
- Fixed not being able to pack traceable items when using a different "default despatch warehouse".
- Fixed not being able to issue Works order lines with no stock and "Transactions Can Take Stock Negative" enabled.
- Changed end pick to clear all assigned users not just on lines not fully picked.
- Stopped Courier appearing when selecting a new line with show line list when skipping on SO picking.
- Changed out-of-stock prompt in create SO to ask to part pick lines with insufficient stock.
- Fixed create sales order only using first FIFO quantity to pick products without full stock.

Windows Mobile

- Added check for when dimensions are set to 0 or left empty to display error.
