**BRIDGE WMS**

WMS Version 1.63

## WMS Version 1.63 Development Release Notes

### Bridge WMS

- Fixed issues validating the work order phase quantity progression.
- New calculated fields have been added to show allocated and free stock figures on the warehouse level tab.
- Added 'show dormant' check box to both tabs in contact manager.
- Corrected pricing/quantities for variance/summary reports in both xml and excel for factored products.
- Fix for missing fact conversion when writing landed cost back to Opera for purchase order receipts that have an overall discount applied.
- Fixed the Opera quantity validation multiplying by the unit size.
- Added support for syncing the purchase order contact from Opera.
- Added support for syncing the purchase order line extended description from Opera.
- Fixed multiple pack lines causing multiple issue transactions rather than 1 when syncing to Opera.
- stocktake syncing with "Stocktake sync to align with WMS" disabled now use the reference and comment from the count.
- Help guide added to the system under the config menu.
- Factored products now show correct formatted values on the issue form.
- If default issue bin is not set to the out bin by default it now allows this to be changed.
- Dormant customers are now hidden on android sales order create customer lookup.

### Android

- The focus on the android scanner when pressing enter on a physical keyboard would not correctly move to the due date field on purchase order create
- Bin and warehouse fields in android now force entry to be uppercase.
- Android works order complete, yield is now shown in factored format when the product is, as well as unfactored for clarity.
- Made check boxes in grids wider so that the number of visible zeroes after the factored value no longer changes depending on quantity on purchase order receive.
- Added new error for scanning already fully packed line on sales order packing.
- Added a check for any active stocktake before prompting for quantity in picking.
- Fixed the quantity box on purchase order put away list changing size when text is entered.
- Added new config to warn, upon receipt, of expiry dates older then currently in stock.
- Fixed scanning focus not returning to pick screen after showing previous picks using review.
- Sales order create now has 'read factored quantities as pieces' change applied to it.
- Fixed stocktake list using incorrect bin when editing lines.
- Fixed ad hoc printing multiplying entered factored quantities by unit size when changing tab.
- Changed stocktaking on android to default to stocktake reference.
- Added support for product/batch separated barcodes to android.
- Added stocktake comment to config and set this to autofill in stocktaking and ad hoc stocktaking.
- Added functionality to see additional barcodes to work order issue when clicking on product code.
- Prefill shipment date automatically on HHD, if global config is enabled.
- Fixed a crash when total boxes are left as blank when 'split by entered box is enabled'.
- Improved WMS camera scanner icon from grey circle to actual camera icon.
- Added config to prepopulate warehouse in ad hoc printing with default warehouse.
- Limited the 'splitting quantity by pack size' to not be a value higher than packed quantity.
- Added list of lines to picking that shows after picking each line.
- Fixed receipt labels only printing the last label selected when not using live transfers/movements.
- Added 4 configs to allow default state of print checkbox to be set separately for sales orders, purchase orders, works orders, and stock.
- Added config to auto open process when only one item on menu.
- Fixed handhold crashing when entering stocktaking menu on devices with a 360dp screen or larger.
- Fixed crash in picking when selecting line to pick from view button on header screen.

- Added error message when scanning invalid barcode into line list in picking.

#### **Windows Mobile**

- Fixed factored quantities not being formatted in review screen in stocktaking on windows mobile.
- Changed purchase orders receipt total received quantity back to using case quantity not unit quantity.
- Fixed windows mobile using pack size from barcode when formatting factored items.
- Changed purchase order receipt label quantity on windows mobile to default to number of cases rounded up.

#### **Kwikstock**

- Fixed UI freezing when creating/deleting a stocktake.
