WMS Version 1.70

WMS Version 1.70 Development Release Notes

Android

- Fixed both warehouse and bin getting focus on the same time in adhoc stocktaking.
- Changed packing to only load lines not assigned to another user.
- Prevented error from showing when prefilling batch with no next traceable set.
- Stopped the end icon on date selector changing to nm error icon after entering invalid date.
- Added sub-menu on android to assign sales orders to user.
- Sales Order assign button now has Icon, and all the assign buttons also now have icons.
- Added ability to select service type and courier by scanning on courier selection screens.
- Fixed a small typo that was causing the county field to clear upon re-entering the delivery address screen for SO creation.
- Fixed back button in assign sales orders crashing on android 11+.
- Added config to pack order when parking in picking.
- Added quantities to phase list in WO progress.
- Added config to skip entry of quantity of serials in stocktaking.
- Fixed serial range prompt from appearing if "Increment by Serial" setting was enabled.
- Fixed orders that are parked remaining parked after picking.
- Fixed app crashing if no work order number or quantity is entered when progressing phases.
- Added permissions check to assigning sales order.
- Added label selection dropdown for SO Pack labels in combined pick and pack.
- Added config to show total price on pack list.
- Fixed scanning courier crashing when not found and not working on dedicated courier button.
- Changed total price to not include the running total and made the total price include discounts in SO packing.
- Set weight on SO packing to use 4 decimal places.
- Fixed "Print Pack Labels Per Line" only working with trigger automatically enabled.
- Fixed decimal rounding always going down instead of following rounding rules used elsewhere.
- Added error message to prevent crash when selecting courier without a service in courier menu.
- Fixed stock lookup not showing all bins with 0 stock with "Display Empty Bins" enabled.

WMS

- Added 'Transfer In/Out' to the type of dropdown in the transaction tab filters.
- Fixed watcher service logging levels to correctly use the right level tag.
- Prevented multiple instances of the watcher service being openable.
- Fixed manual backups scheduled via the watcher service not running without a service restart.
- Prevented watcher service being able to manage itself.
- Prevented replenishment levels from being set to a negative in the stock levels tab.
- Fixed 'assign picker and packer' not asking for picking method from the lines tab.
- Added product last count date filter to the stocktake template designer.
- Fixed pagination not working on the barcode grid in the stock card causing the navigator to behave oddly.
- Moved text fields on the login screen up by 10 pixels.
- KwikStock tools merged into stock manager for the WMS Lite product.
- Added logic to SO Line sync so discount values are processed to 2 decimals the same as the overall discount value.
- Updated Transfer List Sent Qty sub-select field in warehouse product table missed.
- Fixed quantity format in the WO Edit window.
- Added 'View Work Phase Path' option to WO Manager products tab.
- Fixed the updating of SO status in WMS in sync, after deleting a delivery in Opera 3.
- Corrected object ref error when phase regressed with timing enabled from and to a phase which has no phase path line record.
- Fixed trying to remove the first phase from a phase path not working and swallowing the error.
- Fixed customers not being marked as dormant if deleted in Opera to prevent them from being used for SO creations.
- Changed the PO unit price and new unit price field (PO Line receipt) to use 4 decimals.
- Updated courier integration for expect distribution (Pallet Line) API from Stirling to motion.

Windows Mobile

- Changed text of order number and product entry boxes on windows mobile at start of picking.
- Fixed failed pack when at end of picking when packing on windows mobile.
