WMS Version 1.77

## WMS Version 1.77 Development Release Notes

### #Android#

- Added 'comments' entry dialog when pausing SO create with 'comments at end' enabled.
- Fixed issue in picking where focus would go to batch when scanning GS1 with no batch code instead of product.
- Fixed tablet crashing on Sales Order Pack.
- Added XG5 to list of Janam Scanners.
- Added limit to prevent picking partial packs when not enabled on unit type.
- Reprint icon added to Android.
- Removed bin/product textboxes from batch replenishment quantity screen when 'confirm bin/product' is disabled.
- Prevented being able to make multiple transactions by pressing enter key multiple times on the quantity box in stock replenishments.
- Added check for user permission to SO create on Android.
- Added reprint to functionality list in handhold config.
- Fixed no stock error on picking with out-of-stock line that where already picked.
- Fixed stock lookup prefilling username when not set if there are users with no user code.

### #WMS#

- WMS now syncs and uses the split pack setting for factored products from Opera stock profiles to allow/disallow splitting of factored product packs.
- Added "Active" flag to vans for POD and fixed the "Toggle Active" function to toggle this flag rather than delete.
- Fixed user manager and van manager grid layouts resetting when changing either grid's fields.
- New database table "Courier Label Data" to store API courier label requests to reprint without calling the API.
- Change to config file maintainer to improve setting storage and restoration.
- Fixed not being able to confirm return transactions for batches from different warehouse.
- Added file log level config setting to the BackEndSync for SE and Sage systems.

### #Windows Mobile#

- Added limit to prevent picking partial packs when not enabled on unit type.
