WMS Version 1.78

## WMS Version 1.78 Development Release Notes

### #Android#

- Removed bin/product textboxes from batch replenishment quantity screen when 'confirm bin/product' is disabled.
- Prevented being able to make multiple transactions by pressing enter key multiple times on the quantity box in stock replenishments.
- Added functionality to search workorders by component in WO Issue.
- Added prompt for labels when stocktaking serial traceable products.
- Fixed WO issue & complete failing on WO's containing components without a product category.
- Fixed selecting WO selection using product code not working with "Auto issue on WO completion" category.
- Fixed HHD WO completion showing the full order quantity instead of available to make quantity.

### #WMS#

- Added new global config to force Stock conversion utility to use same serials selected for issue in the receipt.
- Fixed error when multiple of the same stock item were despatched on the same package using Royal Mail Web.
- Fixed error when opening handheld config if it is the only permission a user has.
- Removed error preventing over completion of batch WO's on desktop.
- Stopped packing from using different batch from picking when entering lot number
