WMS Version 1.84

WMS Version 1.84 Development Release Notes

Android

- Added a new config, "Show Total Price in Create" to show the total price on SO Create.
- Added a new config, "Process QR codes as GS1" to allow GS1 in QR codes to be disabled.
- Fixed crash when a product is entered with no bin and no default pick bin in Stock Movements.
- Added Required Pick Quantity to Sales Order Lines to allow limiting pick quantities.
- Fixed SO Create not checking serial numbers when entered.
- Stopped WO Create always searching for partial product codes.
- Fixed serial and batch screen on stock Conversion stopping barcode scanning.
- Improved error message when entering a Bin that is on hold or dormant.
- Fixed WO Create not showing hold or dormant bin errors at the start of the process.

WMS

- Fixed Missing Address Line 2 on DX Web SNI courier
- New DX Web courier added to work with the new changes coming September 2026
- Minor fixes for issues found when API key is invalid for DX SNI WEB
- Added 'Pending Delivery Warehouse' against the customer for sales orders to use this warehouse for despatching.
- Resolved foreign key error when trying to add a label to deleted label set.
- Fixed WO Create, issue and complete as a single process causing double allocations when syncing to Opera.
- Fixed desktop packing not using Pending Delivery Warehouse.
- Added config for required pick qty and moved edit to order
- Fixed "Disable Syncing into ERP" in the Global Config, Work Order area not reflecting the true setting value.
- Updated all references of the support email to now reference the new helpdesk email.
- Fixed Product Categories Management grid erroring when opened.

Optional Extras

- New Config "Ignore ERP Transactions on Marked Warehouses" in Optional Extras and New button in the Warehouse Tab "Ignore ERP Transactions" added, when enabled prevents syncing of transactions between ERP and WMS for selected warehouses.
